📍 Pune, India

SUMMARY

Full Stack Developer skilled in MERN Stack development with hands-on experience building scalable, responsive web applications. Proficient in React.js, Node.js, Express.js, and MongoDB, with knowledge of REST APIs, authentication systems, and cloud deployment. Passionate about creating efficient, user-focused applications and AI-powered SaaS solutions.

WORK EXPERIENCE

Full Stack Engineer Intern

Binary Botz

2025-2026

Developed scalable MERN stack applications using MongoDB, Express.js, React.js, and Node.js.

Created responsive frontend interfaces with reusable React components, routing, hooks, and API integration.

Built RESTful APIs with JWT authentication, role-based access control, and secure backend architecture.

Managed MongoDB operations, including schema design, CRUD functionality, query optimization, and aggregation pipelines.

Integrated third-party APIs and real-time features to improve functionality and user experience.

Improved frontend performance through efficient state management, validation, and error handling.

Collaborated on Agile/Scrum workflows involving debugging, code reviews, sprint planning, and deployment.

Supported cloud deployment and monitoring using AWS services, GitHub, and hosting platforms.

EDUCATION

B. Tech CSE

7.32 CGPA

2024-2028

HSC/12th

60%

2021-2023

TECHNICAL SKILLS

Backend:

Node.js, Express.js, REST APIs, JWT Authentication, MongoDB, SQL, PostgreSQL, API Integration

Frontend:

React.js, Next.js, JavaScript, HTML5, CSS3, Tailwind CSS, Responsive Web Design, Redux, React Router,

Development:

Git, GitHub, Agile/Scrum, Postman, VS Code, Debugging, Data Structures & Algorithms, MVC Architecture, SaaS Development

Cloud & AI

AWS S3, AWS Secrets Manager, AWS ECS, AWS Lambda, CloudWatch, Clerk Authentication, Vapi AI, GitHub Copilot, Machine Learning, Prompt Engineering, Anthropic Claude Sonnet 4.5

PROJECTS

Imagify

AI Image Generator

Built an AI-powered image-generation platform using the MERN Stack with secure authentication and a responsive UI.

Integrated AI APIs for real-time text-to-image generation and image management functionalities.

Improved frontend responsiveness and user experience using Tailwind CSS and optimized API handling.

Technologies: MongoDB, Express.js, React.js, Node.js, Tailwind CSS, REST APIs, Vercel

BookSphere

Digital Library Platform

Engineered a role-based digital library system with authentication, seat booking, and book management modules.

Designed responsive user interfaces with real-time data handling using Firebase and MongoDB.

Enhanced platform usability with efficient frontend-backend integration and optimized database operations.

Technologies: React.js, Firebase, MongoDB, Tailwind CSS, Node.js, Express.js

AI Voice Dental Assistant

SaaS Platform

Developed a full-stack AI-powered dental appointment platform with voice assistant integration and subscription management.

Implemented appointment scheduling, admin dashboard, email notifications, and AI voice workflows using modern SaaS architecture.

Integrated Clerk authentication, PostgreSQL, and Vapi AI to deliver secure and scalable application performance.

Technologies: Next.js, PostgreSQL, Tailwind CSS, Clerk Auth, TanStack Query, Vapi AI, GitHub, SaaS Deployment

Jeevaloop

Hospital Management System

Engineered a MERN stack-based Hospital Management System with secure JWT authentication and role-based dashboards.

Built modules for patients, doctors, nurses, and administrators with appointment scheduling and responsive UI features.

Optimized frontend-backend communication and deployed the platform on cloud infrastructure for scalability and performance.

Technologies: MongoDB, Express.js, React.js, Node.js, Tailwind CSS, JWT Authentication, REST APIs, Vercel
